Profile

I'm Yassine, a software engineer with 4 years of experience designing and developing end-to-end digital solutions – from web and mobile applications to advanced software systems that balance performance and innovation. My true passion lies in AI, particularly Large Language Models, machine learning pipelines, RAG systems, and MLOps. I love exploring how AI thinks and learns, building systems that don't just integrate AI but truly leverage its inner workings to solve real problems.

Technical Skills

- **Languages:** JavaScript, TypeScript, PHP, Java, Python
- **Frontend:** React.js, Bootstrap, Tailwind CSS
- **Backend:** Laravel, Spring Boot, Symfony
- **Databases:** MySQL, PostgreSQL, Vector Databases (Qdrant)
- **Cloud & DevOps:** AWS (S3), Docker, Podman, Git, GitHub Actions, CI/CD
- **Testing & Quality:** Unit Testing, Playwright, SonarQube
- **Architecture:** Microservices, REST APIs, Event-Driven Architecture (Kafka)
- **AI & LLMs:** RAG, LangChain, Prompt Engineering, Embeddings, MCP (Model Context Protocol)
- **Project Management:** Jira, Trello, Kanban, Agile

Professional Experience

Full-Stack Software Engineer

Pillot | Casablanca, Morocco | Jan 2026 – Present

- Supporting and improving GPS fleet management systems with real-time tracking, geofencing, route optimization, and comprehensive telematics
- Maintaining and enhancing MCP (Model Context Protocol) integrations to expose fleet data to AI agents, enabling natural language queries on vehicles, trips, and alerts

Software Developer

Bti Advisory | Casablanca, Morocco | Feb 2023 – Dec 2025

- Integrated the CertEurope API for a legal document validation system processing over 1,000 documents/month. Migrated 50 GB to Amazon S3, reducing retrieval time from 8s to 2s (75% improvement)
- Developed and deployed the backend for the Meetpe mobile application – connecting travelers with local guides via a personalized matching algorithm and real-time notifications
- Maintained the CNB banking payment module with Stripe integration and an e-learning platform
- Built a Laravel solution for the Order of Chartered Accountants with CAS authentication and member account management

Software Developer

Easyapp24 | Casablanca, Morocco | Oct 2022 – Jan 2023

- Built a dashboard to schedule and manage social media posts on Facebook, LinkedIn, YouTube, and Twitter using official SDKs

Software Developer

WeCare | Casablanca, Morocco | Oct 2021 – Nov 2022

- Maintained the WE CARE platform (booking, payment, reviews) with a Laravel/Blade/AJAX backend
- Supported the development of a hybrid mobile app with Ionic/Angular and set up CI/CD pipelines

Projects

Meetpe – Travel Mobile App Backend | meetpe.fr

- Laravel backend with a personalized matching algorithm, real-time push notifications, and full guide and traveler profile management

EedgeQuery – AI-Powered Data Platform | eedgequery.space

- I developed EedgeQuery, an AI-powered data platform that connects multiple databases. Users can ask questions in natural language, and the AI provides intelligent answers, analyzes the data, and presents clear, interactive visual insights. This project reflects my passion for building practical, user-friendly AI solutions that make complex data accessible and actionable.
- Documentation: eedgequery.space/docs

Education

Bachelor's Degree in Web Application Development

FST Settât | Settât, Morocco | In progress (Since 2025)

Specialized Technician Diploma in Computer Development

ISTA Berrechid | Berrechid, Morocco | Sept 2019 – Jul 2021

Baccalaureate in Physical Sciences

Lycee Oulad HRIZ | Berrechid, Morocco | Jul 2019

Languages

Arabic: Native | **French:** Fluent | **English:** Professional
